Int'l Appl. No. : PCT/GB03/00156 Int'l Filing Date : January 16, 2003

AMENDMENTS TO THE CLAIMS

- 1. (Currently amended) A method of isolating nucleic acid and protein from each other in a the same sample, said method comprising contacting said sample with a plurality of solid supports, wherein nucleic acid and protein components contained in said sample become bound to distinct the solid supports wherein the solid supports to which nucleic acids components are bound are distinct from the solid supports to which protein components are bound.
- 2. (Original) The method of Claim 1, wherein both DNA and RNA are bound to the same solid support.
- 3. (Original) The method of Claim 1, wherein DNA and RNA are bound to distinct solid supports.
- 4. (Original) The method of Claim 3, wherein DNA and RNA are bound to different solid supports in separate steps.
- 5. (Currently amended) The method of any one of Claims Claim 1 to 4, wherein RNA and protein, or DNA and protein, or DNA, RNA and protein are isolated from the same sample.
 - 6. (Original) The method of Claim 5, wherein said RNA is mRNA.
 - 7. (Currently amended) The method of Claim 5 or 6, wherein said DNA is genomic.
- 8. (Currently amended) The method of any one of Claims Claim 1 to 7, wherein the total RNA and/or the total DNA is isolated.
- 9. (Currently amended) The method of any one of Claims Claim 1 to 7, wherein the total nucleic acid component is isolated.
- 10. (Currently amended) The method of any one of Claims Claim 1 to 9, wherein the total protein component is isolated.
- 11. (Currently amended) The method of any one of Claims Claim 1 to 10, wherein said sample is a food or allied product, or is a clinical, environmental or biological sample.
- 12. (Currently amended) The method of any one of Claims Claim 1 to 11, wherein prior to contacting said sample with said solid supports, the sample is subjected to a preliminary treatment step to free the nucleic acid and/or protein components from structures or entities in which they may be contained.

Int'l Appl. No. : PCT/GB03/00156 Int'l Filing Date : January 16, 2003

13. (Currently amended) The method of any one of Claims Claim 1 to 12, wherein prior to contacting said sample with said solid supports, the sample is subjected to a cell isolation procedure.

- 14. (Original) The method of Claim 13, wherein one or more particular cell populations are specifically isolated.
- 15. (Currently amended) The method of any-one of Claims Claim 1 to 14, wherein the sample, or a cell population isolated therefrom, is subjected to a cell lysis step prior to contacting said sample with said solid supports.
- 16. (Original) The method of Claim 15, wherein cell surface proteins of cells within or isolated from said sample are subjected to an *in vitro* modification procedure prior to the cell lysis step.
- 17. (Currently amended) The method of any one of Claims Claim 1 to 16, wherein the sample is not divided at any stage of the method.
- 18. (Currently amended) The method of any one of Claims Claim 12 to 16, wherein the sample is divided after cell isolation and/or lysis or after said preliminary treatment step.
- 19. (Currently amended) The method of any one of Claims Claim 1 to 18, wherein said sample is contacted with said solid supports sequentially or simultaneously or in parallel.
- 20. (Original) The method of Claim 19, wherein in a first step DNA is isolated from said sample, in a second step RNA is isolated from said sample and in a third step, protein is isolated from said sample, and wherein said steps may be performed in any order.
- 21. (Currently amended) The method of any one of Claims Claim 1 to 20, wherein DNA is isolated on a support carrying surface carboxyl groups.
- 22. (Currently amended) The method of any one of Claims Claim 1 to 21, wherein DNA is isolated by binding to a solid support, in the presence of a detergent.
- 23. (Currently amended) The method any one of Claims Claim 13 to 21, wherein cell lysis and nucleic acid or DNA binding to a solid support occur simultaneously or concomitantly.
- 24. (Currently amended) The method of any one of Claims Claim 1 to 23, wherein RNA is isolated using an RNA-specified capture-probe carried by or attached to, or capable of binding to said solid support.
- 25. (Original) The method of Claim 24, wherein said capture probe is or comprises of dT oligonucleotide or dU oligonucleotide.

Int'l Appl. No. : PCT/GB03/00156 Int'l Filing Date : January 16, 2003

26. (Currently amended) The method of any one of Claims Claim 1 to 25, wherein protein is isolated using an appropriate binding partner/ligand carried by or attached to or capable of binding to said solid support.

- 27. (Currently amended) The method of any one of Claims Claim 1 to 25, wherein protein is isolated using a solid support having a surface capable of effecting a chromatographic interaction.
- 28. (Currently amended) The method of any one of Claims Claim 1 to 27, wherein said solid supports comprise particles.
- 29. (Original) The method of Claim 28, wherein said particles are magnetic particles.
- 30. (Original) A kit for isolating nucleic acid and protein from the same sample comprising:
 - (a) a solid support suitable for binding nucleic acid components;
 - (b) a solid support suitable for binding proteins, wherein said supports of a) and b) are distinct solid supports.
- 31. (Original) The kit of Claim 30, wherein the solid support of (a) comprises a support which is selective for binding DNA or RNA or both types of nucleic acid.
- 32. (Currently amended) The kit of Claim 30 or 31, wherein the kit also comprises (c) a solid support suitable for isolation of a specific cell population and/or (d) means for lysing said cells, and/or (e) a means for detecting the nucleic acid and/or protein.
 - 33. (Cancelled)
